Subject: Exercise Study Questions

Importance: High

Martin -

I spoke with Sue Wrenn this morning about product for the above study. A couple of things I need for you to confirm -

1) The reference product needed is Marlboro Lights (Sue had Marlboro Ultra Lights in her notes; she will need some additional time to get Marlboro Lights from the factory)

2) The start of the clinical confinement is scheduled for end of March (several things need to happen before product can ship - Sue has to receive approval from the ATF [this has been requested] and we need the affidavit executed by PAREXEL)

If you can let me know today, I will close the loop with her.

Thanks,
Valerie
